R Block, 6th main road, Anna Nagar, Chennai-40 | 7358200483 | **Varnikha04@gmail.com** | **www.linkedin.com/in/varnikhavarshini** | https://leetcode.com/u/_varnikha-24/

OBJECTIVE

Aspiring Computer Science graduate seeking a Software Development role to apply proficiency in Python, Java, C++ and SQL in building scalable applications. Eager to leverage hands-on experience in machine learning, full-stack development, and database management to contribute to innovative projects while growing in a collaborative team environment.

EDUCATION

Sri Venkateswara College of Engineering, Chennai: **May 2026**

- Bachelor of Computer Science Engineering, Sri Venkateswara College of Engineering.
- Graduation: May 2026

Higher Secondary, Chennai: **2022**

- Vani Vidyalaya Senior Secondary & Junior College

Secondary School, Chennai: **2020**

- Vani Vidyalaya Senior Secondary & Junior College

CERTIFICATIONS

Machine Learning*:* Simplilearn: **September 2024**

- Completed *Introduction to Machine Learning* course covering supervised and unsupervised algorithms including Decision Trees, k-Nearest Neighbours, and Clustering.
- Implemented small ML models on sample datasets using Python and Scikit-learn, and gained practical exposure to model evaluation and accuracy improvement.

SQL: Hacker Rank SQL (Basic): **December 2024**

- Achieved SQL certification by demonstrating proficiency in writing and optimizing SELECT, JOIN, GROUP BY, and subqueries for data analysis.
- Practiced real-world query problems involving data extraction, manipulation, and aggregation on relational databases.

Pandas: Kaggle: **December 2024**

- Completed Pandas hands-on course covering data import/export, indexing, filtering, grouping, and handling missing values.
- Built Python scripts to clean, transform, and summarize datasets efficiently for analytical workflows.

PROJECTS

Style Transfer Project:

- Implemented a CNN-based model to apply artistic styles to images while preserving content structure using TensorFlow/PyTorch. Achieved visually appealing transformations with minimal distortion.

RAG-Powered Document Chat Application:

- Built a backend RAG chat system using FastAPI that processes user documents and enables contextual AI conversations through a hybrid database architecture (SQLAlchemy/ChromaDB), implementing document chunking, sentence-transformers embeddings, and Google Gemini LLM integration with JWT authentication and user data isolation.
- Tech Stack: FastAPI, Python, SQLAlchemy, SQLite, ChromaDB, Google Gemini, sentence-transformers, JWT, bcrypt.

Smart Expense Tracker:

- Developed a command-line expense management system that allows users to log, categorize, and visualize daily expenses. Implemented features for category-based budgets, monthly summaries, and CSV export. Integrated SQLite for persistent data storage and Matplotlib for graphical analysis of spending trends.
- Tech Stack: Python, SQLite, Matplotlib.

INTERNSHIP

Data Science Intern – SkillCraft Technology: **March 2025**

- Performed EDA and visualization on real-world datasets using Python and built a Decision Tree model (~85% accuracy) for customer behavior prediction.

SKILLS

Technical Skills:

- Programming Languages: Python| Java | C++ | SQL | Fast API.
- Machine Learning: Implemented basic models using Python.
- Web Development: HTML | CSS |JavaScript.

Soft Skills:

Problem-solving, Communication, Time Management, Leadership.

LANGUAGE

- **English:** Fluent.
- **Hindi:** Fluent.
- **Telugu:** Conversational.
- **Tamil:** Conversational.
